## OBJECTIVE

---

Full Stack Developer with 2.6+ years of experience, actively seeking full-time roles in Java Full Stack Development.

## SKILLS

---

### Development and Programming

Java, Spring Boot, Microservices, Spring Cloud, Redux, React.js, MySQL, MongoDB, OAuth 2.0, Tailwind CSS

### Infrastructure and Tools

Kafka, Docker, DevOps, Git, Postman, Figma, AWS, ServiceNow, VMware Workspace One UEM

## PROJECTS

---

### CrowdCraft

- Crowdcraft is a platform that allows users to participate in events or join organization teams. Hosts can organize events without a team by finding members through the platform. Users can book tickets and chat with hosts. Users can also become hosts once their request is accepted by the admin.
- Built using Java Spring Boot, Spring Cloud, MongoDB, MySQL, and Apache Kafka, Crowdcraft follows a microservices architecture. The front end is developed using React, Redux, and Tailwind CSS.
- Features a WebSocket-based chat service for real-time communication, implements its own identity provider for authentication, and stores images in an S3 bucket for efficient management. ([GitHub Link](#))

### Timeszone

- Timeszone provides a comprehensive platform for users to browse and explore watches from various brands. The interface is user-friendly, ensuring seamless navigation to easily find and purchase watches.
- Allows the admin to schedule offers, provides OTP and username/password login methods for security, and enables users to download order invoices. Built on Spring Boot with MySQL for the database, and hosted on AWS for scalability and reliability. ([GitHub Link](#))

## EXPERIENCE

---

### Assistant System Engineer

Aug 2021 - Apr 2023

Tata Consultancy Services

*Bangalore, India*

- Played a pivotal role in the successful migration to Workspace ONE UEM. Led problem analysis, incident support, and proactive issue management. Identified and escalated new trends or issues to global teams and VMware vendors, driving solutions to completion. Additionally, tracked incidents and migration status, providing comprehensive statistics to managers and stakeholders.
- Leveraged PowerShell scripting to automate solutions for common issues, including issue analysis, feasibility assessment for automation, implementation, and testing, streamlining operations, and reducing manual effort.

## EDUCATION

---

Java Full Stack Development - Bootcamp, Brototype

2023-2024

B.E Computer Science and Engineering , Anna University

2017-2021
